## 1 Removable Mask

The mask is easy to remove and/or install. It is guided by strong neodymium magnets to help snap it into place. Its purpose is to shield the rider from excessive wind, dust, and small flying objects. It has two mouth vents which are covered by mesh filters to filter out smaller particles.

NOTE: The mask is for aesthetics and comfort only. It does not provide real protection.

## 2 Comfort Sleeve / Neck Roll

The comfort sleeve makes the helmet look like a ¾ helmet. Inside the sleeve there is a comfort liner that covers the riders neck.

NOTE: The sleeve is not for protection.

## 3 SpeedView® Retractable SunVisor

The retractable internal sun visor protects the rider from excessive sunlight, dirt, and small flying objects. It is optically clear and features a state of the art fog-free technology, a anti-scratch hardened coating, and UV protection.

## 4 KwikWick II® Liner Fabric

The removable and washable liner features a soft and supple hypo-allergenic, anti-bacterial material with advanced moisture wicking properties.

## 5 Aero-tuned Ventilation

Two intake vents across the front of helmet and additional mouth vents in the mask force cool air in.

## WARNING

This helmet is certified and passes DOT testing as a half helmet only and does not provide as much coverage or protection as a full face or three quarter helmet. If you want more protection, you should buy a true full face or three quarter helmet.

Use the removable mask and the comfort sleeve only for weather protection and light protection from dust and debris; not for impact protection. Improper use of the mask and the comfort sleeve may cause severe injury or death by impacts exceeding the helmet's protection capability.

## Introduction

Congratulations for acquiring a premium ScorpionExo® helmet. This helmet embodies the latest, state-of-the-art design, engineering and technology available in the market today and is an excellent investment for your comfort and protection.

Please remember that no helmet can protect you against all possible or foreseeable impacts even when built with the latest and best materials and technology.

The following information will help you to enjoy and properly care for your helmet.

## Function

A helmet's main function is to protect your head from impact in case of an accident. To accomplish this, a helmets surrounds your head with a matrix of materials designed to absorb and cushion impact energy in some accidents. A helmet is also designed to provide you with comfort while riding at speed and in various weather conditions. Yet, there is a trade-off: A helmet decreases hearing sensitivity, peripheral vision and physical movement to a certain extent while providing protection and comfort.

## Fit

It is important for maximum safety that your ScorpionExo® helmet fit snugly and comfortably on your head with the retention strap (chinstrap) properly and snugly fastened. With the chinstrap securely fastened, move the helmet side to side, up and down, and forward and backward to ensure that there is no excessive movement of the helmet on your head. Your skin should move with the helmet.

## Sun Visor

The sun visor on your ScorpionExo® helmet provides protection from weather, small flying objects, and wind. Additional tinted sun visors are available to protect your eyes from bright sunlight. The ScorpionExo® SpeedView® internal sun visor allows you to instantly lower the shield while riding.

## WARNING

NEVER USE A DARK OR TINTED VISOR IN DARK OR POOR VISIBILITY RIDING CONDITIONS. This is not only unsafe, but also illegal in most countries.

NEVER WEAR A VISOR THAT HAS BECOME SCRATCHED OR WORN OUT, OR RIDE WITH A VISOR THAT IS FOGGED BY CONDENSATION. THE SUN VISOR IN YOUR HELMET COMES WITH A SCRATCH-RESISTANT COATING. The sun visors are coated, which also loses their capacity in about 2 years. For this reason, we recommend that you change your visor at least every two years with a new one.

## Ventilation Systems

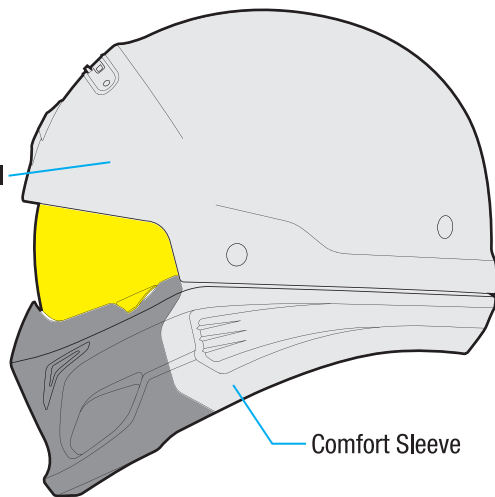

Ventilation systems are designed and engineered to maximize your comfort in a wide range of temperatures. Familiarize yourself with the vents on your street helmet. Some vents have detents allowing partial opening and closing, thereby controlling intake and exhaust airflow. Your helmet ventilation systems should be kept clear of any obstructions including dirt, insects or other items which could interfere with proper flow of air. The ventilation systems play an important role, especially during physical exertion or hot-weather riding. Ventilation helps decrease the possibility of fogging on the faceshield.

## Helmet Overview

FRONT VIEW OF THE HELMET

SIDE VIEW OF THE HELMET

### ⚠ WARNING ⚠

Always check to make sure the crown liner, neckroll and cheek pad are installed before using the helmet. A helmet without the crown liner and/or cheekpad may increase your risk of serious injury or death.

**DO NOT ATTEMPT TO ADJUST WHILE RIDING**

## SpeedView® Sun Visor Removal

USING SPEEDVIEW® SUN VISOR

To lower the sunvisor, simply pull the SpeedView® Sunvisor lever down.

To raise the sunvisor, simply push the SpeedView® Sunvisor lever up.

REMOVING SPEEDVIEW® SUN VISOR

Firmly hold the sun visor with your hand and gently pull one side out away from the helmet to release.

Repeat to release the opposite side.  
Reverse process for installation.

## Installing and Removing The Mask

# COVERT

### INSTALLING THE MASK

Push the mask into two holes in front of the sleeve until you hear it “snap” into place.

Be sure to hear this “click” sound to secure the mask. Then pull the mask to outer direction several times to check whether it is securely assembled to the helmet.

#### IMPORTANT NOTE:

The Mask is NOT FOR PROTECTION but for comfort use. The Covert is a HALF HELMET that meets or surpasses DOT standards.

### REMOVING THE MASK

First, push the button (in red circle) on one side of the sleeve.

While pushing the button completely with one hand, pull out the mask with the other hand.

Do the same for the other side of the sleeve.

- 1 Remove the Front Face Mask. Then Remove the Cheek Pads and neck Roll from the Comfort Sleeve.

- 3 Remove the Comfort Sleeve. See images below.

Unlatch the Release Lever with one hand.

Grab the back of the Comfort Sleeve using your other hand and pull strongly (Fig. 1). At the same time, push the red circled area using your thumb for leverage (Fig. 1).

Then lift off the Comfort Sleeve releasing the 2 hooks on each side of the helmet (Fig. 2 - Fig. 3).

Reverse the process to install the Comfort Sleeve. - Once installed, make sure the sleeve is properly secure.

## Comfort Sleeve Removal

- 2 Unlock the Comfort Sleeve Release Lever. See images below.

Press “UP” the Locking Lever (red) using your fingers, or a tool like a coin or your motorcycle key to unlock the Comfort Sleeve Release Lever (yellow).

To Lock the Comfort Sleeve, just slide down the Locking Lever. Note: The Locking Lever is set-up to be tight to hold the Comfort Sleeve safely for protection. It may require a bit of force to release.

## Removing and Installing The KwikWick® II Liner

### REMOVING THE CROWN LINER

After removing the mask and the comfort sleeve, you can remove the crown liner.

Detach 4 snaps in front and back of the crown liner, then pull it off from the helmet.

Reverse the process to install it again.

### REMOVING THE NECK ROLL & CHEEK PAD

After removing the comfort sleeve, you can remove the neck roll & cheek pad in the comfort sleeve.

Just pull it off by detaching 6 velcro points around it.

Reverse the process to install it again.

## Securing and Wearing Your Helmet

Do not simply pull your helmet down onto your head like a hat. Your ScorpionExo® helmet should be worn as follows: Using both hands grab the helmet's bottom rim while holding the chin straps with your thumbs. Then "roll" the helmet onto your head starting at the forehead. Continue rolling the helmet on towards the back of the head until it comes to rest with your head fully in contact with the inner lining and cheek pads.

### HOW TO USE CHINSTRAP

- 1 Lead chinstrap through eyelets of both rings.
- 2 Curl back and thread through taller ring with nylon pull-tab.
- 3 Securely tighten strap until comfortable and safe.
- 4 Press and snap buttons together to manage excess strap.

### FIRMLY AND SECURELY FASTEN YOUR CHINSTRAP

Check your chinstrap for tightness occasionally as vibration or wind may loosen it.

### Cleaning Your Helmet System

None of the components of your ScorpionExo™ helmet can be damaged by water. All headliners and sweat-wicking cheek pads are machine washable. Wash them with a mild detergent in warm water and allow to air dry. Hand washing is recommended, but machine washing is also permitted. Use the "delicate" cycle to prevent the agitator from damaging the sweat-wicking material covering the liner parts,

we recommend to place the parts in a washing bag. Do not place lining parts in the dryer: Excess heat may damage the foam and coverings. The faceshield may be cleaned with plastic polish or mild soap and water. The shell of your helmet should be cleaned using only a mild detergent and water.

### Warning

For your safety, it is important that you completely read the owner's manual and all warning labels.

Although there is no visible damage on your helmet, general wear and tear over time may affect overall function of protective helmet and increase the risk of injury in accident. It is advisable to replace your helmet no later than every 5 years from purchase.

### DO NOT

**DO NOT** ride without snugly fastening your chinstrap.

**DO NOT** clean your helmet with petroleum products, solvents, benzene, thinner or cleaning agents.

**DO NOT** paint over your helmet's finish without totally protecting and isolating the shock-absorbing liner and plastic parts. Your warranty will otherwise be invalidated.

**DO NOT** drop your helmet from any height onto a hard surface. This could cause damage to your helmet's finished and/or decrease its ability to protect you.

**DO NOT** place your helmet on your motorcycle's rearview mirror: The sharp pressure from the mirror's edge will compress and damage the helmet's shock-absorbing liner.

### DO NOT continued...

**DO NOT** place your helmet on the motorcycle's seat or fuel tank. It can easily roll off and hit the ground causing damage to the helmet. It is best to place your helmet on the ground so it cannot fall in any direction.

**DO NOT** ride with a scratched faceshield/visor. This can impair your vision, especially at night.

**DO NOT** modify any part of your helmet, e.g., painting or drilling the shell, or cutting and pressing the shock absorbing liner.

Installation of sound systems, speakers and microphones reduces your helmet's ability to protect you and is not recommended.

**DO NOT** use the helmet again if it has either been dropped or involved in an accident. Replace it even if the damage is not visible to the naked eye.

**DO NOT** wear a dark or tinted faceshield (including the retractable SpeedView™ Sunvisor) in dark or poor visibility riding conditions.

**DO NOT** place your headliners and cheek pads in the dryer after washing. Allow them to air dry.

**DO NOT** attempt to remove, change or replace your faceshield while riding your motorcycle or ATV.

**DO NOT** use paint which requires heat curing.

### Warranty

Should you have a warranty claim, please call 888-672-6774 or email [warranty@scorpionusa.com](mailto:warranty@scorpionusa.com) during business hours.

NOTE: The warranty is for defects in materials and workmanship only. There is no warranty for the helmets involved in accidents or that have been dropped or impacted.
